2. Background Information

The Steel Master Plan 1.0 approved in June 2021, is aimed at achieving a stable and predictable trajectory for the industry, so that businesses and investors can invest with confidence in building up production capacity, innovation, skills, and expertise.

A key medium-term goal is to match supply to demand that can support localisation: there is over-capacity in basic long steel commodity products, but no supply of many of the steels which are required by the auto industry, the mines and yellow metal equipment sectors. The steel industry should have a clear goal - to produce some or all of the steel components which these key downstream industries will need to comply with their local production targets. There is therefore a need to develop a strategy that outlines a proposed way forward for the industry.

The IDC has significant exposure in the steel industry and has proposed to lead the development of a diversification strategy that can influence higher levels of local production and import replacement together with higher efficiencies and competitiveness.

2.1 Steel Master Plan

The Steel Master Plan has identified the need for the right mix of integrated and mini-mills and corresponding technologies to produce the required primary steel products for key sectors of the economy. The impact and the sustainability of these production facilities has also been flagged.

It is estimated that sub-Saharan Africa (excluding South Africa) imports about 50% of its rebar from outside the continent. Total steel demand in Africa is estimated at 35 million tons per year, of which the Continent (mainly South Africa and Egypt) produces about 12-15 million tons. Upgrading the value-add of the mills would allow the South African industry to cost-effectively supply most of the domestic and regional requirements.

In addition to regional export demand, of importance is the need to diversify primary steel production to meet localization needs in key downstream sectors to reduce the reliance on imports. Automotive and renewables driven by localization initiatives is seeing an increased interest by OEMs towards local production. The steel industry being a key input into these sectors must position itself to take up the opportunity.

2.2 Objectives

The main objective of this assignment is to undertake the required research work and develop the first iteration of the steel diversification and localisation strategy for South Africa. To reach this main objective, the assignment shall therefore include the following:

- a) Undertake an assessment and summary of current literature and identify gaps required for further research work;
- b) Undertake a detailed primary steel supply and demand assessment at the product level taking into consideration imports and the localisation opportunities within selected areas;
- c) Identify, assess and prioritise supply needs in South Africa and the region reducing reliance on imports;
- d) Analyse the capability and capacity of various mills in South Africa and the region;
- e) Undertake an equipment and machinery assessment and identify interventions/investment relevant to establish and upgrade local manufacturing competence and competitiveness in the high value-added areas to satisfy local, regional and global demand potential;
- f) Propose a short, medium and long term strategic pathway to diversification in SA to drive initiatives for local and global competitiveness

The planning horizons to consider are:

- ✓ Short term: 1 to 5 years.
- ✓ Medium term: 5 to 10 years; and
- ✓ Long term: 10-20 years

The above objectives are discussed in more detail in the work packages defined below.

3. Scope of work/Terms of reference

Annexure 5: Certificate of Independent Bid Determination

SBD 9

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
