2. Project background and objectives

In 2012 the South African Government adopted a National Infrastructure Plan which intends to transform our economic landscape, create a significant number of new jobs, and strengthen the delivery of basic services. The plan also supports the integration of African economies.

On the back of the National Infrastructure Plan, the Presidential Infrastructure Coordinating Commission (PICC) designated Strategic Integrated Projects (SIPs) to support economic development and address service delivery. Each SIP has a significant economic or social importance to the country and comprises of many specific infrastructure components and programmes.

Of special relevance to this Project is "SIP 21m: Small Harbours Development: National", which envisages the development of new small harbours and the revitalisation of existing small harbours.

The Small Harbours and State Coastal Property Development Unit (SHDU) is part of the Programme Management Office (PMO) Branch of the Department of Public Works and Infrastructure. The SHDU's primary objective is to drive the integrated development of small harbours and state coastal properties. The SHDU is responsible for the implementation of "SIP 21m: Small Harbours Development: National" and has aligned the work in two separate phases:

Phase A: Redevelopment of existing harbours, especially the proclaimed fishing harbours in the Western Cape which was completed in 2022.

Phase B: Development of new harbours in the Northern Cape, Eastern Cape and KwaZulu-Natal

Under Phase B, several candidate sites are of interest and have potential for development either as fully fledged small harbours or as recipients of basic infrastructure upgrades. The Phase B candidate sites in which new development might take place are categorised into:

Tier 1: These are primary sites, which generally have a strong history of political will and/or private developer interest to be developed as small harbours. They generally have a local community in need of upliftment or support and their physical characteristics lend themselves to some form of coastal development.

Tier 2: These are secondary sites, which are sites of lesser interest than the Tier 1 sites. They might support smaller communities, be more remote, or be of a more challenging physical nature

to develop. These sites may have been overlooked in the past and have relatively strong merit for further development.

The objective of this RFQ is to procure the services of a suitably experienced built environment consultant to undertake small harbour planning studies for the Tier 1 sites. The Tier 1 sites to be assessed are within the Northern Cape, Eastern Cape, and KwaZulu-Natal, specifically Port Nolloth, Port St Johns, and Port Shepstone.

The objective of the small harbour planning studies is to prepare development masterplans. Deliverables would include master plans which would be used as long-term improvement planning tools for the future phased roll-out of small harbours and associated marine and terrestrial infrastructure. These master plans are termed Spatial and Economic Development Frameworks (SEDFs).

3. Scope of work/Terms of reference

3.1 Overview

- 3.1.1 South Africa's current twelve (12) proclaimed fishing harbours are in the Western Cape and were constructed by the State between the 1940s and the early 1950s to create a vibrant fishing industry. South Africa has not constructed a new public small harbour since. The SHDU prepared SEDFs for these twelve (12) proclaimed fishing harbours. These SEDFs are actively used today for planning and implementation and was instrumental in ensuring the success of the recent programme valued at over R500 million for the rehabilitation of the proclaimed fishing harbours.
- 3.1.2 The primary scope of work is to prepare SEDFs for three Tier 1 sites, viz., Port Nolloth in the Northern Cape, Port St. Johns in the Eastern Cape, and Port Shepstone in Kwa-Zulu Natal.
- 3.1.3 The SEDFs are intended to guide the future phased roll-out of landside and marine infrastructure to ultimately develop fully-fledged small harbours in these locations.

3.2 Spatial Economic Development Plans

- 3.2.1 The initial assessment would consider the candidate sites in terms of its suitability to be developed (either as small harbours or in another fashion to provide coastal amenities); consider aspects like the physical attributes of the candidate sites, its potential for socio-economic uplift, the history of the site in terms of marine access, its links to the hinterland, etc.
- 3.2.2 The SEDF would consider technical and socio-economic drivers and would rely on the technical experts' experience and knowledge to make detailed commentary on each candidate site as follows:
 - 3.2.2.1. **Needs Analysis / Demand Assessment:** Outline the consideration given to vessels to be accommodated (e.g., Tour Guide Boats, Ski Boats, The Navy) and likely tenants and commercial and other activities (e.g., boat building, tourism, fishing, aquaculture, museums, maritime academies, etc.),
 - 3.2.2.2. **Site Suitability / Site Conditions** (including how vessel shelter would be achieved, geotechnical conditions, dredging requirements, sea state, potential siltation of entrance

channels and navigable waterways, constructability, safe vessel navigability, likely operational uptime, etc.)

3.2.2.3. Desktop analysis of existing data (the Service Provider must obtain the data from various sources, such as, the Local Municipality, CSIR, SA Weather Service, etc):

- Topographical Survey
- Geotechnical Survey (Land side)
- Environmental Scoping
- Safety and Security
- Traffic and Transport Assessment
- Bathymetric Survey
- Geophysical Survey (marine side)
- Metocean Data Collection (climate, currents, water levels, wave modelling, etc)
- Land-use
- Property Ownership
- Bulk Services
- Heritage Assessment

3.2.2.4 Socio-economic Considerations: Outline likely economic benefits and investment attraction to the region and opportunities for beneficiation of local communities and job creation,

3.2.2.5 Development Options and Analysis: Outline which concepts or configurations of small harbours were considered (e.g., traditional harbour extending into the sea with a breakwater to provide sheltered waters or a “dug-out” type waterfront / canal system sheltered behind existing land),

3.2.2.6 Risks and Opportunities (especially red flags), categorised by political, technical, financial, operational, socio-economic, etc.

3.2.2.7 Collective Vision Statement (Assessment report)

3.2.2.8 Operational Requirements

3.2.2.9 Financial analysis report

3.2.2.10 Legal, regulatory, and policy framework

3.2.2.11 Stakeholders register and consultation framework

3.2.2.12 Harbour Operational Management Framework

3.2.2.13 SEDF drawings

3.2.2.14 Implementation plan

3.2.2.15 Executive summary

3.3 Deliverables and Timeframes

3.3.1 The service provider is required to visit each site.

3.3.2 Three (3) SEDFs will be produced. The preparation of the SEDF would take six (6) months and would conclude with a detailed report outlining the proposed developments.

3.3.3. The three (3) detailed studies will yield recommendations on the technical and socio-economic feasibility. Outputs will include proposed spatial layouts for short-, medium-, and long-term development (in approved Computer-aided design format). Indicative capital cost estimates will also be required. A soft copy of the drawings, reports, and worksheets in its original format (for example, DWG format, MS Excel format, MS Word format, etc) shall be included in the deliverables.

3.4. Communication

3.4.1. A Steering Committee comprising government technical resources from IDC, ISA and DPWI would be constituted during the project initiation phase to provide oversight to the

project.

- 3.4.2. It is required that the successful service provider will chair and minute progress meetings with the client monthly.
- 3.4.3. It is required that the service provider will engage interested and affected parties. The client would be in attendance to support and contribute. Stakeholder engagement and social facilitation would be according to District Development Model principles.
- 3.4.4. It is further required that the Service Provider will attend and contribute to:
 - at least two (2) 'internal' government provincial task team meetings for each of the three (3) provinces.

- 3.6.2 A company capability statement and relevant project sheets illustrating recent experience with this type of work.
- 3.6.3 A proposed project organisation chart and CVs of key staff to be deployed to the project. It would be permissible for individual resources named in the organisation chart to cover several of these study areas provided their experience was commensurate with the task at hand.
- 3.6.4 A project schedule in a format which can be used to monitor and gauge progress through the life of the study.
- 3.6.5 A price is requested from bidders for the development of three SEDFs.
