2. BACKGROUND INFORMATION

2.1. Overview

Government approved South Africa Infrastructure Investment Plan on 27 May 2020. Thereafter, South Africa’s Economic Reconstruction and Recovery Plan of October 2020 took the Infrastructure Investment Plan to the next stage and placed infrastructure investment and implementation at a pivotal role in driving the country’s economic growth prospects in the years ahead. In the context of severe fiscal constraints, this requires that the State create an enabling environment that can leverage significant private capital for long-term infrastructure investment. Infrastructure South Africa (ISA) through its State Asset Optimisation Programme aims to work with the Property Management Trading Entity (PMTE) to leverage and maximise the optimisation of the state strategic fixed asset portfolios of buildings and land parcels.

The Department of Public Works and Infrastructure (DPWI) through its Property Management Trading Entity (PMTE) is tasked with the responsibility to optimise the State’s property business, support government’s service delivery objectives through suitable accommodation, develop revenue enhancement programme and reduce costs by leveraging the fixed asset property portfolio and address spatial imbalances.

PMTE seeks to fulfil this responsibility by optimising the utilisation of its fixed asset portfolio via the programme called the State Asset Optimisation Programme (SAOP). The programme will pursue a portfolio approach in the pursuit of stimulating the economy, improving service delivery imperatives, improving efficiencies, contributing to the transformation of the property sector and creating jobs. To achieve this, the PMTE through this programme will aim to build confidence with the investment community and various stakeholders, whilst optimising value and reducing associated risks to the DPWI and the rest of Government. The current state of the economy also requires Government Departments to rationalise costs and for its appointed entities to become self-sustaining and less reliant on the fiscus.

In order to achieve the above, the PMTE working in collaboration with Infrastructure South Africa is seeking to develop the SAOP, which aims to attract capacity (capital and skills) from the private sector to collaborate and partner with Government in achieving the set objectives.

This SAOP includes, but is not limited to, review of the fixed asset register, identification of suitable strategic assets for revenue enhancement and service delivery improvement initiatives, and development of suitable business cases, financing and funding strategies, and implementation models for highest and best use of the identified assets.

The SAOP will also position the PMTE 2030 Strategy, that envisage PMTE as an independent entity that is able to drive revenue generation in such a way that it is able to be financially sustainable over time and justified as an affordable, value-for-money proposition for government. The programme is also part of the PMTE plan to pursue a more efficient strategy to improve the state of its infrastructure asset base and enable client departments utilising these assets to adequately deliver services and have a developmental impact through:

- i. The improvement of office accommodation through efficient asset management throughout the planned life of the asset and aims to re-orientate the Republic of South Africa (herein 'the State') towards long-term view of public infrastructure management.
- ii. Promoting spatial inclusivity, spatial integration, and equitable access through the active planning, developing and refurbishment of state assets within mixed-use precincts to counter the historical spatial injustices and to benefit from upgraded infrastructure.
- iii. Promoting sustainability and contributing to the NDP 2030 and sustainable development goals by prioritizing stimulus of the Green Economy through sustainable buildings and precinct design in line with DPWI's Green Building Policy.
- iv. Unlocking National Priorities by promoting economic development and driving inclusive growth through job creation, Women and Youth development, SMME development, skills development, and training within the entire build environment value chain.
- v. Leveraging funding from public and private sector.

The immovable asset portfolio under the custodianship of the DPWI comprises of approximately 30 000 land parcels (4.7 million hectares of land – accounting for approximately 4.5% of the total country land area) on which some 90 000 facilities (equivalent to 33.9 million m² of floor space) are located. Refer to Table 1 below for an overview of the 90 000 facilities:

No. of Building Assets	90 000		
Total Floor Area	33,9m m ²		
Net Asset Value (2020/21 DPWI Annual Report)	R134,55bn		
Condition of Rated Buildings within Assets	C5	Very Good	583
	C4	Good	30 166
	C3	Fair	43 901
	C2	Poor	5 640
	C1	Very Poor	1 824

Table 1: DPWI Building Assets Portfolio Overview

Note: Assets owned outside of South Africa and those owned by State Owned Enterprises, Other National Departments, Provincial Governments and Municipalities are excluded.

A deemed cost has been quantified for the land parcels at approximately R40 billion and similarly a deemed cost of the buildings and improvements is at approximately R71 billion. In terms of categorisation, 54% (approximately 48 600 structures) of the property portfolio comprises of facilities for specific Departments' service delivery purposes (e.g., prisons, police stations, courts, etc.), 39% (35 000) are residential structures, whilst only 7% (6 300) are offices.

Approximately 3% of buildings are unutilised and 35% of land parcels are vacant. The unutilised buildings and vacant land parcels are not conducive to efficiencies for the PMTE as these properties incur extensive operating costs.

Infrastructure South Africa is tasked with the driving the implementation and providing oversight on the Infrastructure Investment Programme, which includes providing technical support to public sector fixed asset owners to improve efficiency and utilisation of land, properties and buildings.

This ISA intervention is also premised on the acknowledgement that existing building and land portfolio represents substantial state investment and where these assets have been improved the bulk Infrastructure is already installed (e.g. sunk costs). This reduces the majority of the risks associated with accounting for seemingly non-revenue generating aspects of developments.

The SAOP focus areas that will assist and unlock the value of PMTE's in relation to the following:

- i.** Programme roll-out to consider the unutilised or under-utilised strategic buildings and/or land parcels, and thus contribute to also resuscitating dilapidation of central business districts where these assets are located.
- ii.** For service delivery purposes, to enable suitable occupation of the users and improve inherent value retention and efficient usage of the assets.
- iii.** For commercial purposes, to enable private sector participation in utilisation of excess assets to generate revenue for PMTE.
- iv.** Utilise the innovation of private sector participants to enable spatial inclusivity, spatial integration, equitable access and inclusive growth to enable a transformed, inclusive and vibrant active property market.
- v.** Reduce the life-cycle costs of the assets with improved facilities management strategies.
- vi.** Institutionalization of sustainability principles in the facilities management programme.
- vii.** Enable private sector participation in the funding, financing, development, construction and/or refurbishment of existing buildings, and maintenance of these strategic assets.

The PMTE has evaluated over 7000 fixed assets in its portfolio for the SAOP and removed assets that are encumbered, those required for socio-economic programmes and also those contained in environmentally constrained areas. As a result, over 3000 assets will be available for implementation in the SAOP. The list with the respective assets will be shared before the advisory work commences.

The PMTE, supported by Infrastructure South Africa requires the services of an advisory firm/s for the development and implementation of a clear and precise strategy for SAOP to focus on, but not limited to, revenue generation and enhancement, cost saving, disposal, funding and financing, and including asset life-cycle management strategies. Furthermore, the advisory firm/s will lead the development of the PMTE 2030 strategy which will include a business case for the establishment of the PMTE as a public entity. This business case must overtime position the PMTE as a financially sustainable entity with capabilities for the efficient management of assets in the portfolio, future acquisitions and/or new build, leases.
