### **2. BACKGROUND INFORMATION**

---

Infrastructure South Africa (ISA) is supporting the Eastern Cape Department of Rural Development and Agrarian Reform (EC DRDAR) in undertaking the assignment to revitalise the EC Irrigation Schemes Programme. Revitalizing EC Irrigation Schemes is an integral part of an inclusive and sustainable agricultural development in the province.

One of the most significant outcomes of irrigation projects, beyond boosting agricultural productivity, is their role in fostering urban and economic development in rural areas. These projects not only enhance public and agricultural services but also connect communities through road networks and establish new settlements that bolster the rural economy. Irrigation can help improve and stabilize agricultural productivity, thereby contributing to food security and resilience against climate change. Additionally, enhancing rural infrastructure connecting to irrigation schemes can improve water security and reduce reliance on erratic rainfall (World Bank, 2017).

By improving water availability, irrigation schemes can significantly augment the quality of life in rural areas. If all the available land is brought under functional irrigation, it will revive the livelihoods of over 5,200 households and create substantial economic spill-over effects in the Eastern Cape. The irrigation schemes will also, ensure that the province contributes to the achievement of Agriculture and Agro-processing Master Plan (AAMP) which prioritizes the development of an inclusive and job creating sector. Other policies and regulations that help stimulate investment in the rural economy include, but are not limited to, are the Preservation and Development of Agricultural Land Bill and the Climate Change Bill.

Geographically, ten (10) existing irrigation schemes earmarked for this Inception Report are located in Amathole and Chris Hani District Municipalities (as indicated in the table below) with a total area estimated at 9 416 hectares. A total of 4 373,3 hectares is under some kind of production and about 5 042,7 hectares (53,6 percent) of potentially irrigable land is lying fallow due to a long history of dilapidation.

*Table 1: Ten Irrigation Schemes in the EC Province under investigation which are spatially spread across the Chris Hani and Amathole District Municipalities.*

No	Name of Scheme	District
1	Ncorha	Chris Hani
2	Qamata	
3	Bilatye	
4	Shiloh	
5	Seven Stars	Amathole
6	Zanyokwe	
7	Middledrift	
8	Fort Hare	
9	Kibiti /Upper Gxulu	
10	Tyhefu	

Due to the extensive dilapidation in the community owned irrigation schemes, a huge sum of investment is needed to bring the total available hectares into production. The Department of Rural Development and Agrarian Reform (DRDAR) has identified the Budget Facility for Infrastructure (BFI) of National Treasury as a vehicle for such investment. BFI supports the execution of national priority projects and programmes with an aim to support quality public investments through robust project appraisal, effective project development and execution and sustainable financing arrangements. The revitalization of irrigation schemes will ensure that the province expands irrigated agriculture and brings to production the under-utilized communal owned land under traditional authorities in the rural Eastern Cape. In the age of climate change, it is no longer possible to develop agriculture under the rainfed system.

It is against this background that, ISA on behalf of DRDAR, is looking to appoint a qualified service provider to perform condition assessments, investigation, site surveys, develop infrastructure proposals with costed estimates, and identify irrigation schemes infrastructure that is/are ready for a BFI application in 2024/25 financial year (FY).

### **3. SCOPE OF WORK/TERMS OF REFERENCE**

**Note on pricing:**

Disbursements (incidental expenses other than professional fees e.g., travel and accommodation, printing costs, etc.) must be clearly defined, outlining all assumptions. It is of utmost importance to submit clear and comprehensive cost proposals to allow the IDC to fairly compare bid price / cost proposals. If there is no additional fee envisaged for Disbursements, then the bidder must clearly indicate “No Charge / Free of Charge”. Failure to clearly indicate this, would result in IDC penalising your bid response by taking the cost of the highest bidder and adding 50% thereto and apply this rate for purposes of price comparisons. Bidders are therefore requested to respond clearly and comprehensively on this aspect of their bid response.
